Docket No 99N-1168

0822 '99 JUN -7 P2:04

Structure and Initial Data Survey for the Risk Assessment of the Public Health Impact of Foodborne *Listeria monocytogenes*

FDA and FSIS
Risk Assessment Team

What is the purpose of this risk assessment?

- To determine the prevalence and extent of consumer exposure to foodborne *Listeria monocytogenes* and to assess the resulting public health impact of such exposure.

How will the results of this risk assessment be used?

- To provide FDA and FSIS with the scientific information needed to review current programs relating to the regulation of *L. monocytogenes* contamination in foods
- To ensure that such programs provide maximum public health protection

Risk Analysis

Considerations for Risk Managers

How will the results of this risk assessment be used?

- To provide FDA and FSIS with the scientific information needed to review current programs relating to the regulation of *L. monocytogenes* contamination in foods
- To ensure that such programs provide maximum public health protection
